CAREER SUMMARY

Enthusiastic Full Stack Developer with over 7 years of comprehensive programming experience and a strong background in creating innovative solutions for complex problems. Adept at managing time effectively to deliver high-quality results within tight deadlines and experienced in building scalable microservices and automations. Committed to continuous professional growth, aiming to further enhance my capabilities to meet future technological demands.

SKILLS AND STRENGTHS

- Expertise in building dynamic web applications with React and Next.js and libraries like React Hook Form, React Query, and React Redux.
- Proficient in developing high-performance APIs with FastAPI and SQLAlchemy.
- Skilled in utilizing AWS for developing and deploying scalable microservices, API Gateway, Lambda, Secrets Manager, SNS, and SQS, as well as creating automations using AWS Glue and Event Bridge.
- Expert use of TypeScript and Python for improved code quality and efficiency in large-scale applications.
- Experienced in working with both SQL and NoSQL database management.
- Proficient in version control using Git, managing codebases effectively, collaborating with team members, and ensuring smooth development workflows.
- Advanced level in English, enabling effective communication and collaboration with international teams.
- Strong time management and multitasking abilities, demonstrated by managing complex projects and meeting tight deadlines in fast-paced environments.

PROFESSIONAL ACCOMPLISHMENTS

- Automated BTG Pactual's Europe account opening process, reducing process time by 48 hours.
- Developed an assets management application, cutting monthly budget losses by over US\$ 200,000.
- Implemented a money flow dashboard, increasing profit from money applications by 20%.
